

Can A Psychological Counseling intervention Program improve the Communication Skills of The Students?

Abstract:

This psychological counseling intervention program aimed at improving the Communication skills of the students. Many psychological techniques have been applied to achieve that. The Program had been conducted from 2011-2015 for (500) students, employees, and faculty at KSAU-HS. The results show there is significant improvement in the Communication skills among the participants. Based on the result, many scientific and practical recommendations have been presented:

- This Psychological counseling intervention program is highly recommended to the students, employees, and faculty.**
- More researches about the relationship between the outcome of this program and other variables such as (self-confidence, academic achievement, critical thinking) should be investigated.**
