### Checklist for Results & Discussion Section

#### RESULTS:

Result are answering/according to the specific objectives	1	2	3	4	5
Tables and figures correctly displayed	1	2	3	4	5
Results interpretation is ample, quantified and proper	1	2	3	4	5
No duplication of message in the text and tables	1	2	3	4	5
Tables and graphs has title on the top of them	1	2	3	4	5
Appropriate presentation of descriptive statistics (frequency+percentage; mean+st. dev)	1	2	3	4	5
Specified appropriate statistical tests used for inferential statistics + epidemiological measures of association (if applicable)	1	2	3	4	5
Relevant values given for significance level (p-value) / confidence intervals / correlation coefficients / etc.	1	2	3	4	5

#### DISCUSSION:

The same results had been discussed in this section (as opposed to not discussed in the results section)	1	2	3	4	5
Discussion is in line with the results	1	2	3	4	5
Appropriate usage of references for comparison of the results	1	2	3	4	5
Explained why the results differ from previous research (if applicable)	1	2	3	4	5
Clearly explained the importance of the findings (Generally)	1	2	3	4	5
Sufficient amount of comparison is present	1	2	3	4	5
Mentioned some possible areas for further research	1	2	3	4	5
